Total Security

TOTAL SUREFIRE DOOR SECURITY

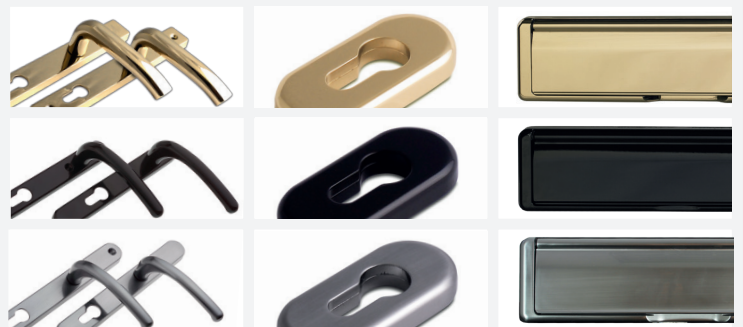

SIMPLY SHUTTING THE DOOR ENGAGES THE TRIGGER
THAT AUTOMATICALLY FIRES ALL LOCKING POINTS

Complement your door with the
ultimate in Decorative Hardware.

Fab&Fix

30 years of
perfection

COMPLETE DOOR LOCK SECURITY SOLUTION

SureFire is a complete door lock security solution for PVCu, timber or composite doors.

SureFire offers the **highest level** of door security in a lock that's easy to use, simply shutting the door engages the trigger that **automatically fires all locking points**.

The range of lock variants, optional accessories and beautifully crafted hardware, gives you effortless high

security multi-point locking that looks great and fits any style of home.

The SureFire lock is available in a choice of gearbox positions, either **Classic** for a central door handle position or; for composite and timber **Heritage** style doors, with a higher gearbox for use with an escutcheon.

HIGH SECURITY HOOKS

Twin tapered anti-jemmy hooks with anti-saw protection and hardened anti-drill inserts for lasting security performance and positioning.

INTELLIGENT GEARBOX

Clever latch design ensures all elements are aligned before locking points are thrown to prevent misalignment. For use with Euro or Invincible cylinders.

AEROSPACE HOOKS

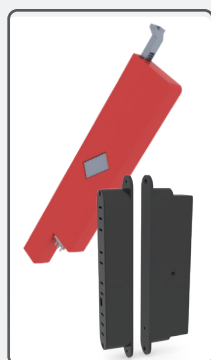

Smooth, easy operation, manufactured from aerospace grade aluminium, the hooks allow for a lighter key torque operation and guarantees robustness when firing.

HIGH QUALITY KEEPS

Adjustable high quality keeps secure all locking points tightly to the frame, clamping the door shut to prevent any forced entry.

ACCESSORIES

OPTIONAL MOTOR

A motor can be added to any SureFire lock to drive the movement of the hooks and latches. Connected to the mains using either a continuous loop or Power Jacks, which transfer power wirelessly between the door and frame. The lock can then be connected to a compatible access control device such as a Keypad.

ADDITIONAL KEYPAD

The addition of a simple access control device used in combination with the motor adds additional functionality to your lock.

Only Fab&Fix is available in perfectly matching Hardex finishes.

HARDEX
PATENTED
FINISH

Each piece of hardware is engineered for enhanced strength and durability, whatever your style preference. The key to this enhancement is Hardex, an invisible skin that creates unmatched resilience. Hardex finishes offer exceptional resilience and durability.

Hardex can sail through 1000 hours of rigorous profession testing, confirming it's the most durable finish on the market. However, there's still no replacement for the rigours of the field and Fab&Fix products have racked up plenty of test hours there too - the Fab&Fix brand is 30 years old!
